CR Micro (688396.SS): A domestic major in MOSFETs, expanding into IGBTs and power ICS

CR Micro is a leading domestic manufacturer of MOSFETs, with a strong focus on power MOSFETs. The company has a long history of innovation and has established a solid reputation in the industry. Its products are widely used in various applications, including automotive, industrial, and consumer electronics. The company's revenue has grown steadily over the past several years, reflecting its strong market position and expanding product portfolio.

In addition to its core MOSFET business, CR Micro is also expanding into IGBTs and power ICS. This strategic move is aimed at diversifying the company's product offerings and capturing a larger share of the power semiconductor market. The company has invested significantly in R&D to develop new technologies and improve its manufacturing processes. This investment is expected to pay off in the future, as CR Micro continues to expand its market reach and drive growth.
